# RICHARDS STEEL FABRICATION PTY LTD

## CAPABILITY STATEMENT

### ABOUT US

Father and son, Peter and Alan Richards first founded the partnership that would one day become Richards Steel Fabrication Pty Ltd. When the partnership merged in 2004, the family owned and operated company became solely run by Alan. Taking a small business from a handful of staff, Alan turned Richards Steel Fabrication into one of the Gold Coast's most reputable companies for structural steel work.

Richards Steel Fabrication Pty Ltd are a locally owned and operating steel fabrication business located at the southern end of the Gold Coast, catering to private builders and large construction companies. We pride ourselves in being known as a one stop shop, incorporating our in house drafting and fabricating to onsite welding and installation to make each job seamless.

We are dedicated in continuing our commitment to be competitive, reliable and professional in the structural steel industry. With projects such as Game Over at Helensvale, Darrell Lea Factory in Sydney and Aldi Molendinar to our credit, Richards Steel Fabrication is the answer for all your structural steel needs.

We at Richards Steel Fabrication pride ourselves on being a diverse and community orientated company that embraces family values.
